External Device Definition Processing 253

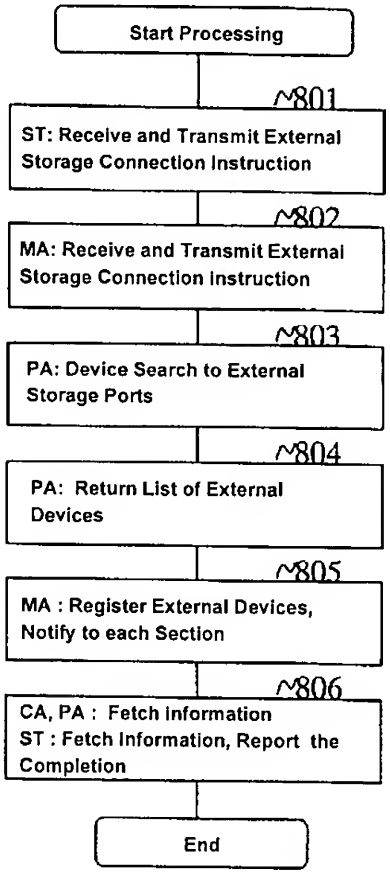

Fig. 9

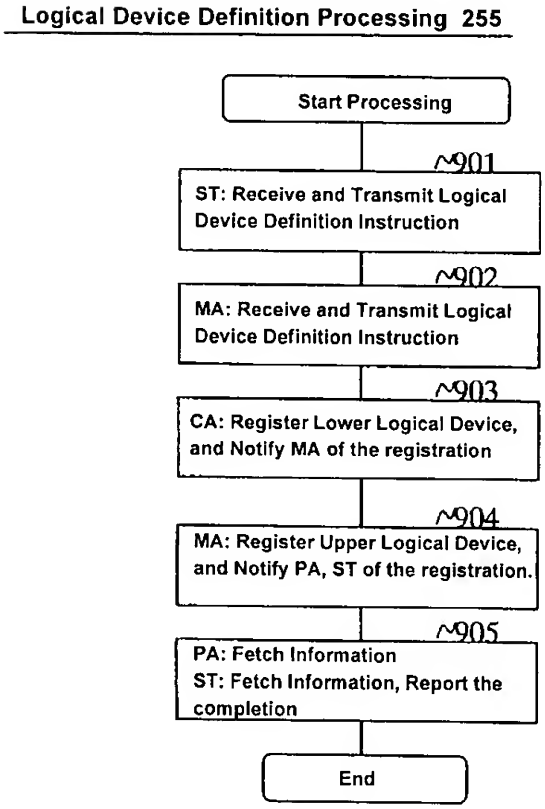
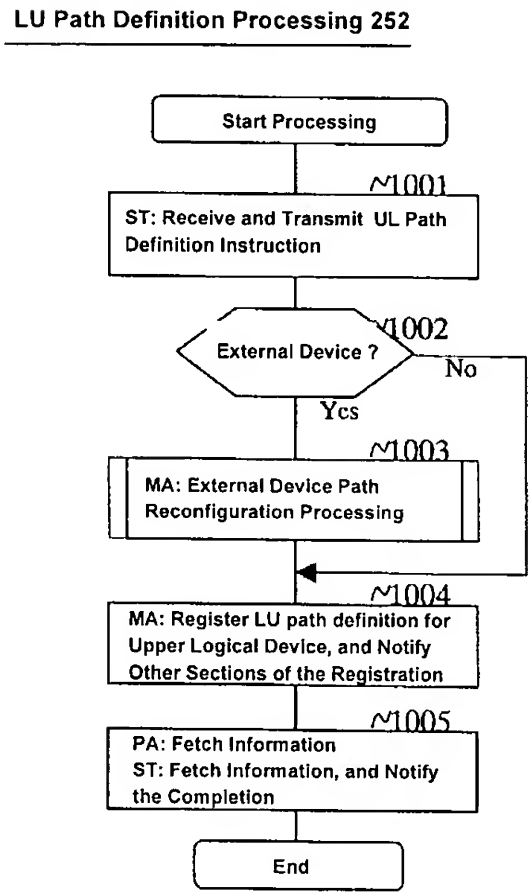


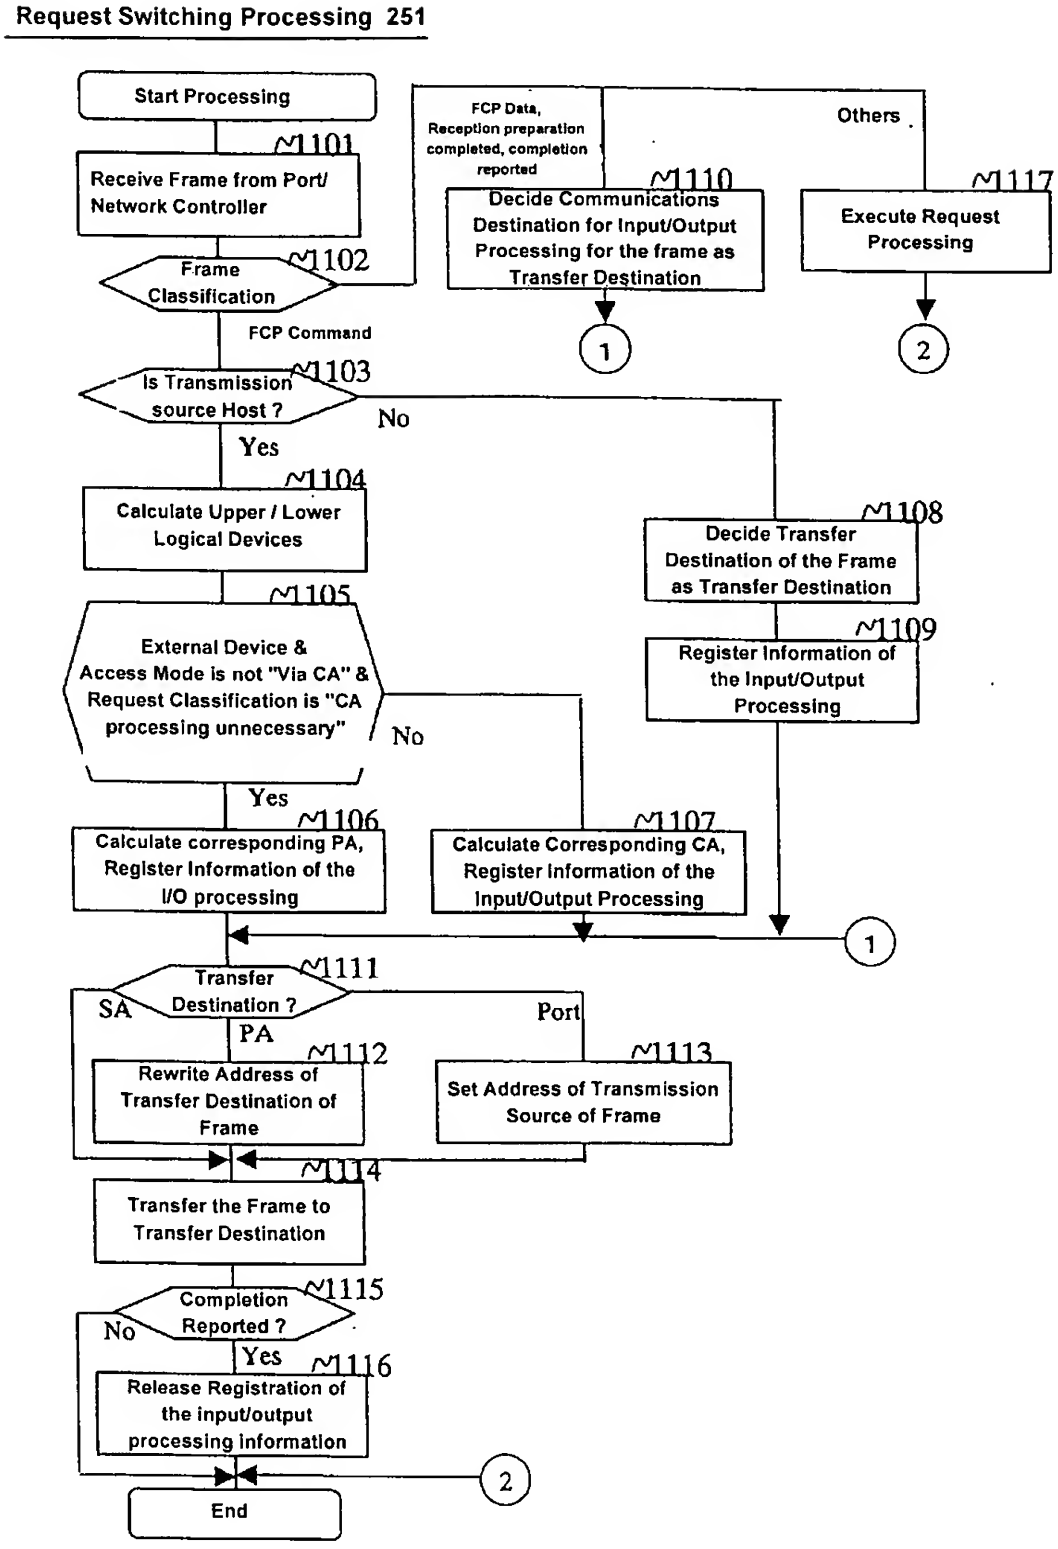
Logical Device Definition Processing 255
Start Processing
901
ST: Receive and Transmit Logical Device Definition Instruction
902
MA: Receive and Transmit Logical Device Definition Instruction
903
CA: Register Lower Logical Device, and Notify MA of the registration
904
MA: Register Upper Logical Device, and Notify PA, ST of the registration.
905
PA: Fetch Information
ST: Fetch Information, Report the completion
End

Fig. 10



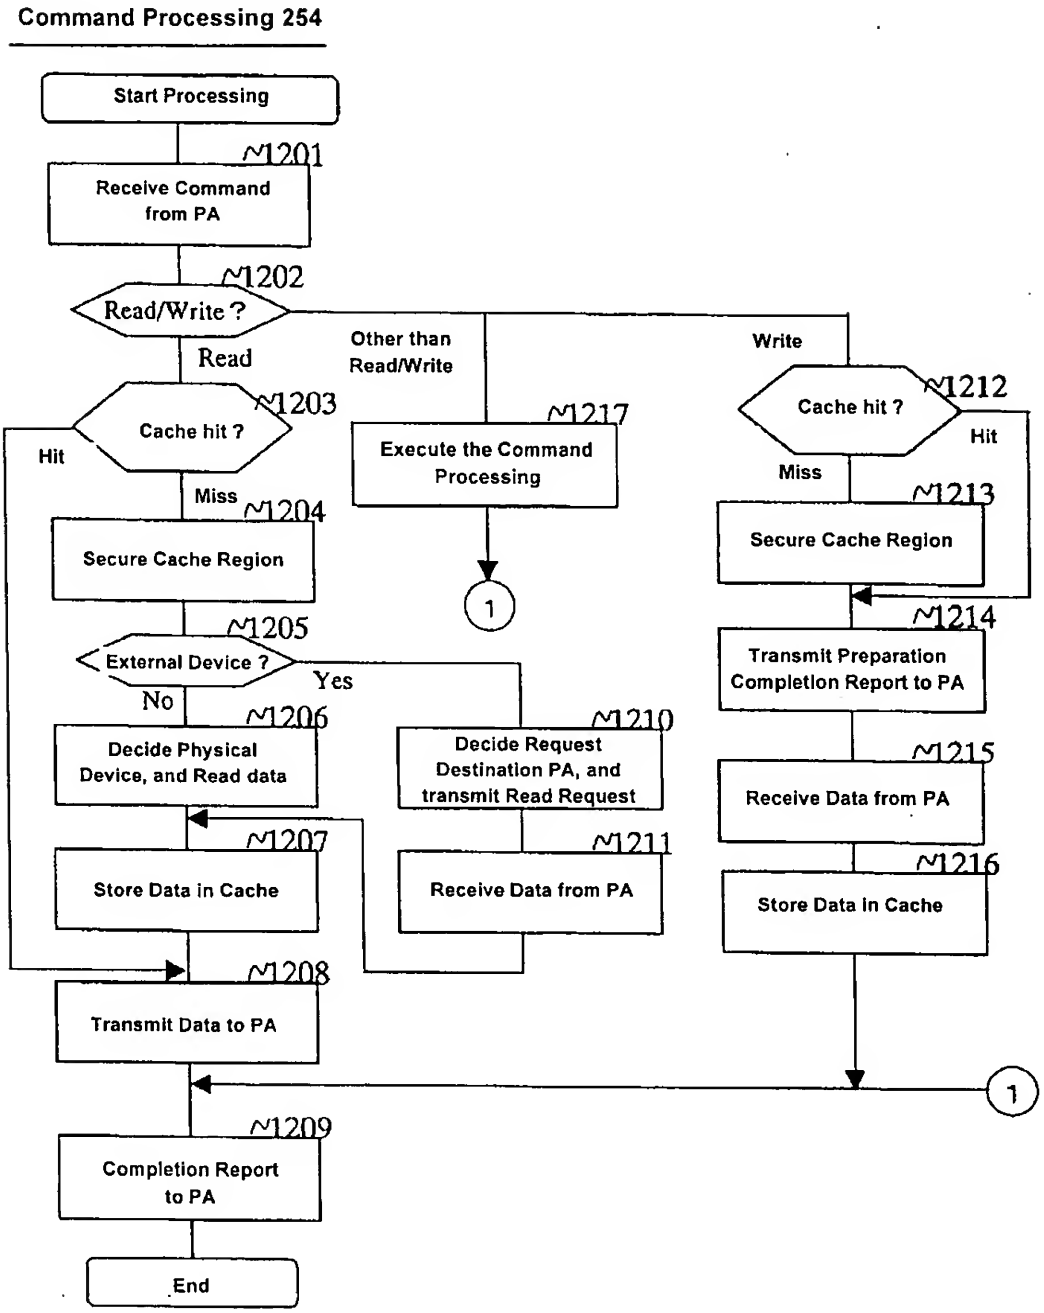
LU Path Definition Processing 252
Start Processing
1001
ST: Receive and Transmit UL Path Definition Instruction
1002
External Device ?
No
Yes
1003
MA: External Device Path Reconfiguration Processing
1004
MA: Register LU path definition for Upper Logical Device, and Notify Other Sections of the Registration
1005
PA: Fetch Information
ST: Fetch Information, and Notify the Completion
End

Fig. 11



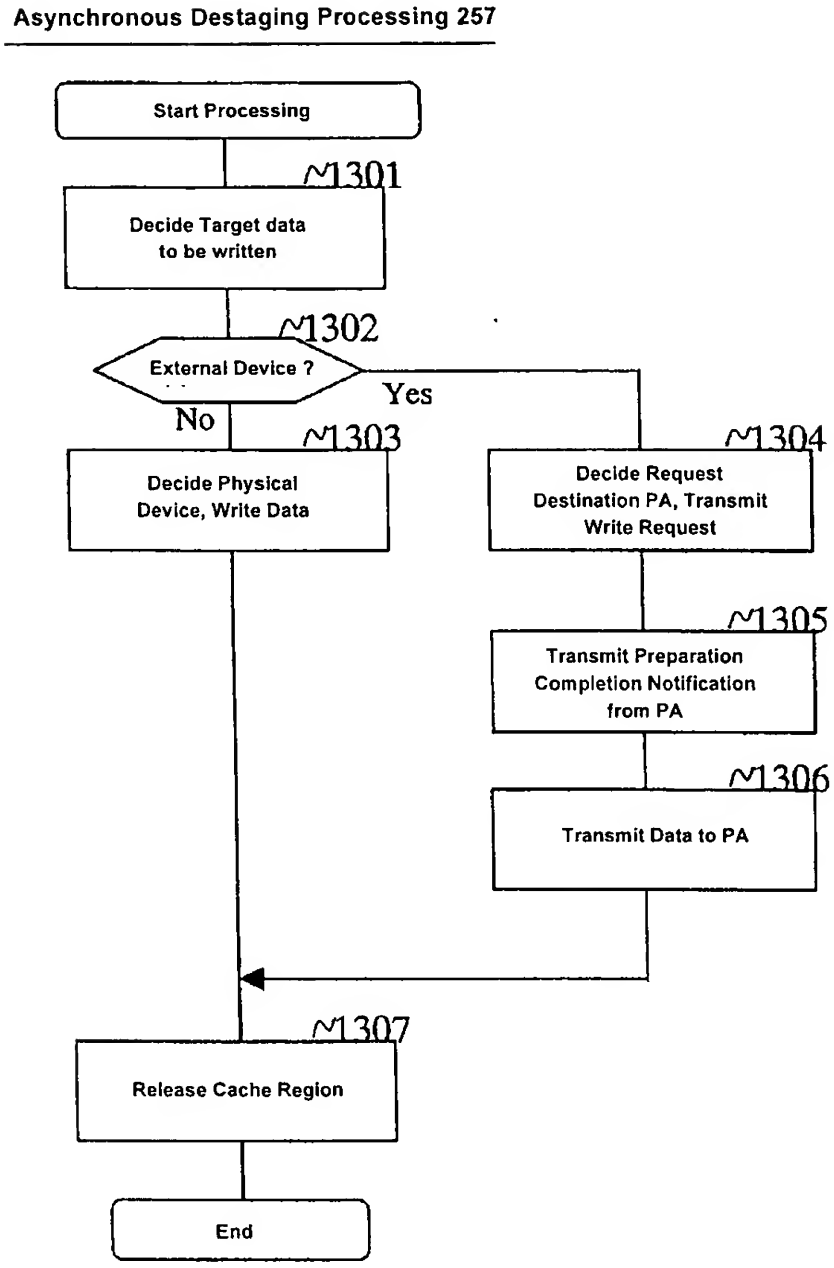
Request Switching Processing 251
Start Processing
1101
Receive Frame from Port/ Network Controller
1102
Frame Classification
FCP Command
1103
Is Transmission source Host ?
No
Yes
1104
Calculate Upper / Lower Logical Devices
1105
External Device & Access Mode is not "Via CA" & Request Classification is "CA processing unnecessary"
No
Yes
1106
Calculate corresponding PA, Register Information of the I/O processing
1107
Calculate Corresponding CA, Register Information of the Input/Output Processing
1111
Transfer Destination ?
SA
PA
Port
1112
Rewrite Address of Transfer Destination of Frame
1113
Set Address of Transmission Source of Frame
1114
Transfer the Frame to Transfer Destination
1115
Completion Reported ?
No
Yes
1116
Release Registration of the input/output processing information
End
FCP Data, Reception preparation completed, completion reported
Others
1110
Decide Communications Destination for Input/Output Processing for the frame as Transfer Destination
1117
Execute Request Processing
1108
Decide Transfer Destination of the Frame as Transfer Destination
1109
Register Information of the Input/Output Processing
1
2

Fig. 12



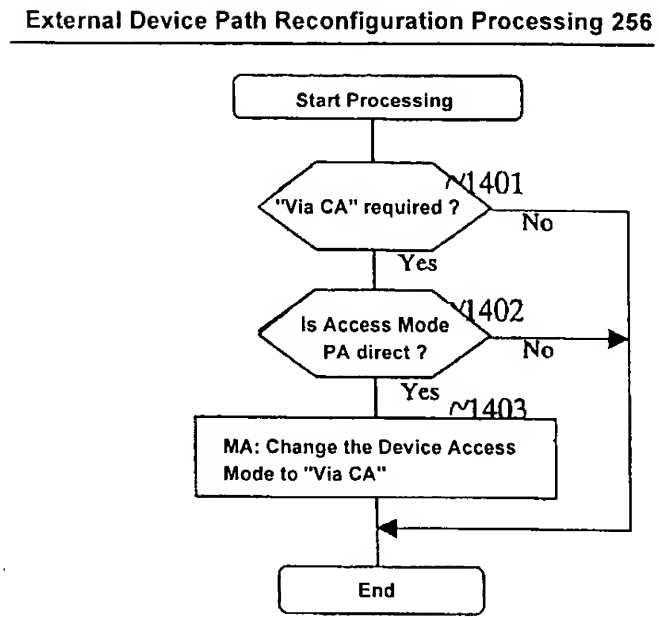
Command Processing 254
Start Processing
1201
Receive Command from PA
1202
Read/Write ?
Read
Other than Read/Write
Write
1203
Cache hit ?
Hit
Miss
1204
Secure Cache Region
1205
External Device ?
Yes
No
1206
Decide Physical Device, and Read data
1207
Store Data in Cache
1208
Transmit Data to PA
1209
Completion Report to PA
End
1217
Execute the Command Processing
1
1210
Decide Request Destination PA, and transmit Read Request
1211
Receive Data from PA
1212
Cache hit ?
Hit
Miss
1213
Secure Cache Region
1214
Transmit Preparation Completion Report to PA
1215
Receive Data from PA
1216
Store Data in Cache
1

Fig. 13



Asynchronous Destaging Processing 257
Start Processing
1301
Decide Target data to be written
1302
External Device ?
Yes
No
1303
Decide Physical Device, Write Data
1304
Decide Request Destination PA, Transmit Write Request
1305
Transmit Preparation Completion Notification from PA
1306
Transmit Data to PA
1307
Release Cache Region
End

Fig. 14



External Device Path Reconfiguration Processing 256
Start Processing
"Via CA" required ?
1401
No
Yes
Is Access Mode PA direct ?
1402
No
Yes
1403
MA: Change the Device Access Mode to "Via CA"
End

Fig. 15

External Device Path Reconfiguration Processing 256

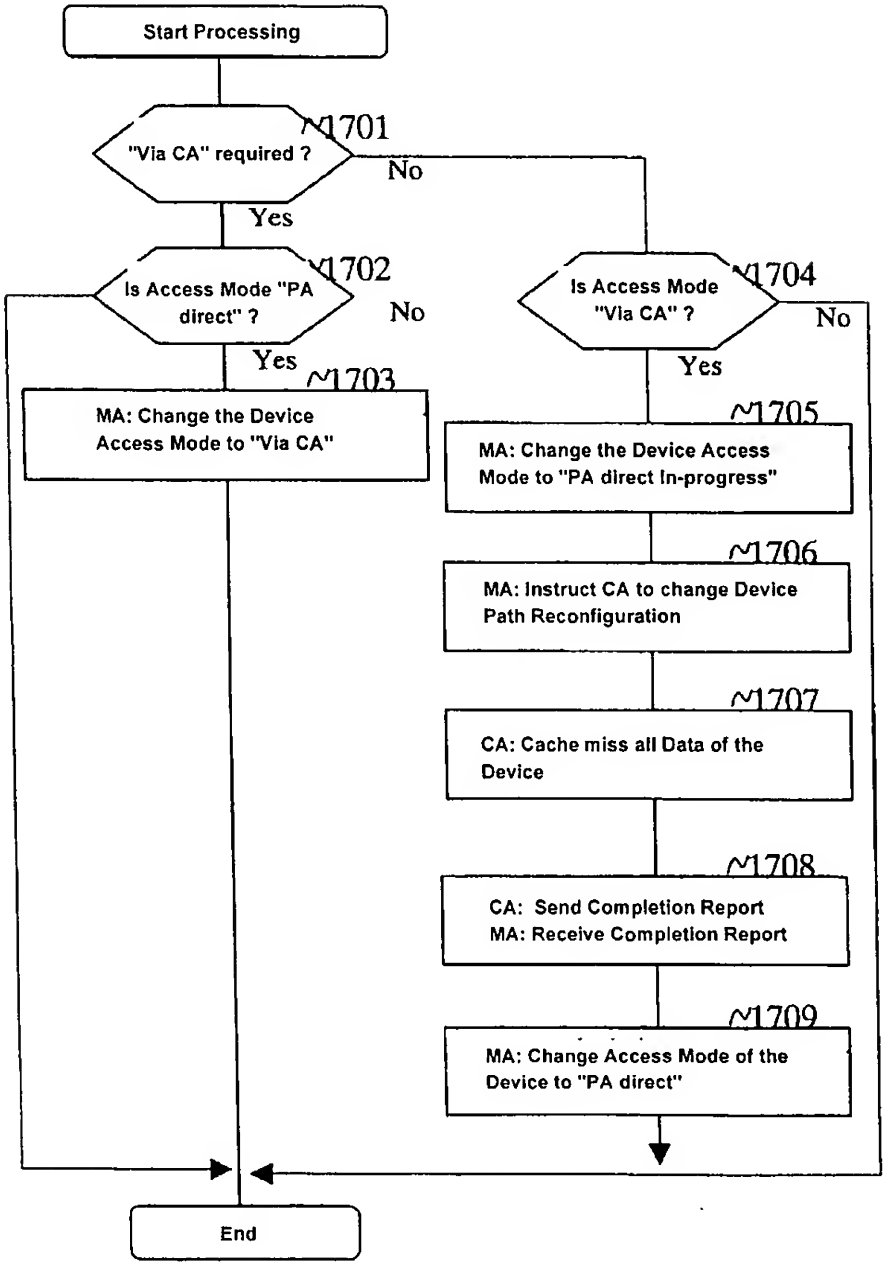


Fig. 16

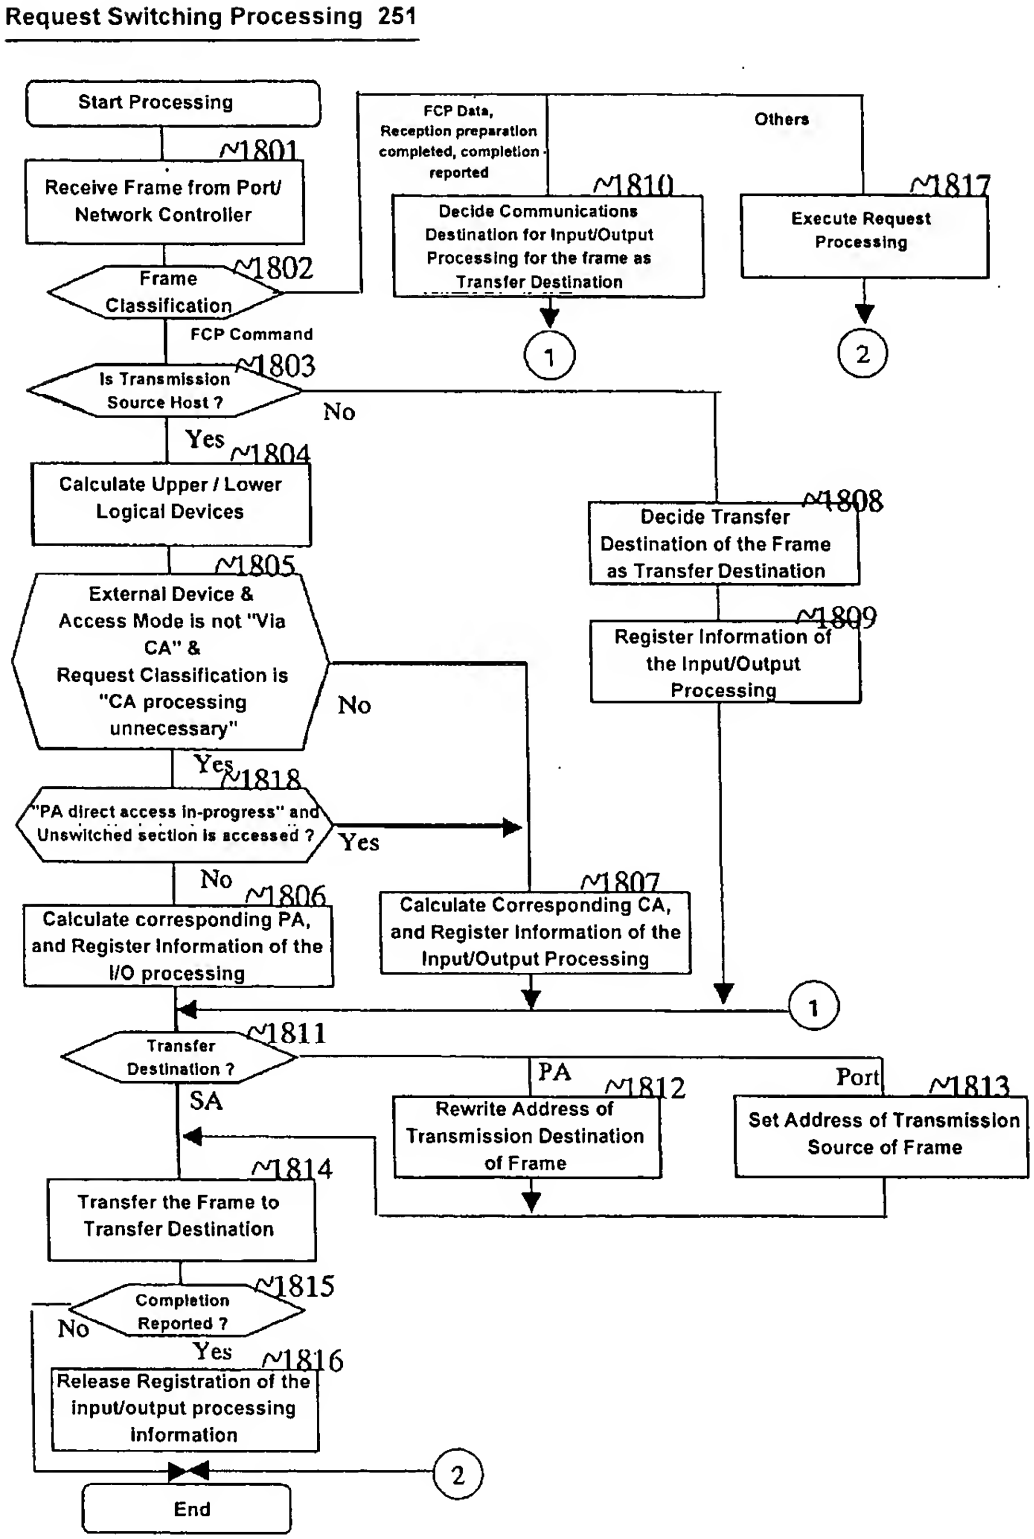

Request Switching Processing 251
Start Processing
1801
Receive Frame from Port/ Network Controller
1802
Frame Classification
FCP Command
1803
Is Transmission Source Host ?
Yes
No
1804
Calculate Upper / Lower Logical Devices
1805
External Device & Access Mode is not "Via CA" & Request Classification is "CA processing unnecessary"
Yes
No
1818
"PA direct access in-progress" and Unswitched section is accessed ?
Yes
No
1806
Calculate corresponding PA, and Register Information of the I/O processing
1807
Calculate Corresponding CA, and Register Information of the Input/Output Processing
1811
Transfer Destination ?
SA
PA
1812
Rewrite Address of Transmission Destination of Frame
Port
1813
Set Address of Transmission Source of Frame
1814
Transfer the Frame to Transfer Destination
1815
Completion Reported ?
No
Yes
1816
Release Registration of the input/output processing information
End
FCP Data, Reception preparation completed, completion reported
Others
1810
Decide Communications Destination for Input/Output Processing for the frame as Transfer Destination
1817
Execute Request Processing
1808
Decide Transfer Destination of the Frame as Transfer Destination
1809
Register Information of the Input/Output Processing
